Hospital Project Checklist

Quickly run through this checklist to make sure your hospital project submission is in order. There is a tight turn-around for marking these projects -- It will not be possible for me to chase you down for anything missing.

-- Team Checklist --

[   ] Make sure your project is on a github repository

[   ] Make sure that the repository is PUBLIC and all files are there.

[   ] Look through the Hospital Project Evaluation Rubric

[   ] Create a project-level ".readme" file in your github repository
      [   ] ".readme" includes the code content you've worked on (models, views, controllers)
      [   ] ".readme" summarizes contributions of every group member
      [   ] ".readme" contains all group members first names, last names, student numbers
      [   ] ".readme" contains any other contribution or value that you've contributed.

[   ] Make sure there is a folder for all documentation resources
      [   ] ERDs included
      [   ] Justifications for relationships included
      [   ] Wireframes included
      [   ] Any other documentation you wish to share
      [   ] Make sure each document contains the group members who contributed
      [   ] .PDF, .JPG, .PNG is preferred for documentation
      [   ] If you wish, you can create sub-folders with each team member's name

-- Individual Checklist --

[   ] 2 Data Driven Features Completed

[   ] Lab Work is Included

[   ] Revise this whole checklist a second time!
